Greetings from Crimson Racing! We launched a new website! Check it out at www.alabamafsae.com

Get on Board Day
Classes have started at the University of Alabama and we’re excited to start the new competition season! Get on board day was August 29th where a dozen members were present to recruit new members. Students could see the CR 19 in person and could even participate in a racing simulator. We are actively recruiting so come by the office if you’re interested in becoming a part of the team!

Races with John Allen
John Allen, an alumnus of the University of Alabama, flew three of our members out to races in Sonoma, CA and Watkins Glen, NY. John Allen drives professionally in the Pirelli GT 4 America Sprint X Series. In Sonoma, our team manager Oakley Prell, became part of his team for the weekend. He got the opportunity to interact with Allen’s race crew and driving coach.

McAbee Visit
McAbee Construction, Inc. has been a long-time sponsor of Crimson Racing and we got the opportunity to show them the CR 19. We can’t wait to continue our strong partnership with them throughout the upcoming year along with our other sponsors.

Grant Through Denso North America Foundation
The Denso North America Foundation provides grants to colleges and universities to help students advance their education in engineering and technology. By receiving this grant, it allows us to upgrade our engine to a newer model. It also gave us funds to develop an AC engine dynamometer, a device that measures the power output of an engine.

What’s Next?
We are quickly approaching our first test drive day of the season and we are so excited! We will be testing new prototypes and collecting performance data for the CR 20. We’re continuing to finalize designs and beginning to manufacture CR 20. The team will also be racing at the Lamar County Shootout on September 28th. We are so excited to see what the new year brings!
